Innovation in Weight Management
Novel ingredients, regulatory challenges and go-to-market strategies

By Mark J Tallon, PhD
Mark J. Tallon, PhD

Mark holds a first degree with honours in exercise physiology, a Masters degree in nutrition science and a PhD in nutritional biochemistry. He is currently founder and CSO of NutriSciences, Inc, a consultancy firm specializing in European and Pan-American regulatory compliance of dietary supplements. Mark is a member of the Institute of Food Science & Technology, Institute of Biology, and the Nutrition society. Through these societies registered as a certified biologist and nutritionist.

Other affiliations include Institute of Food Technologists, American Botanical Council, American College of Nutrition, The Physiological Society and the American Medical Writers Association. Mark is also an editorial board member of world leading trade and academic research journals including; Food Ingredients Health and Nutrition, World of Food Ingredients, Natural Products Insider and Journal of the International Society of Sports Nutrition.

Chapter 6  Conclusions

Summary 160

Introduction 160

Successful strategies in weight management 161
Differentiate your product 161
Promote a clear brand message 162
Use efficacious ingredients 163
Target consumers with a value proposition 163

The end of dieting? 164

Key ingredients 165

Sensation based marketing 166

Is the future ultra-niche? 167

Co-operative relationships the key to success 168
